DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-22 and 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Toy et al. (U.S. 5,931,222) and Vrtis et al. (U.S. 6,751,099).

Toy and Vrtis disclose coated heat spreaders comprising all of the applicant's claimed and disclosed limitations of the instant invention.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Colleran (U.S. 5,098,320) in view of Dozier, II et al. (U.S. 5,820,014).

Colleran discloses a method comprising: applying a pre-attached solder(36) to the surface of the heat dissipation device (14) surface contacting the thermal interface material (82).

Application/Control Number: 10/612,834

Art Unit: 3743

Colleran fails to disclose the solder is pre-attached by cold forming.

5. However, Dozier teaches solder being pre-attached by cold forming (column 9, lines 14-28)

Given the teachings of Dozier, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method of Colleran with solder being pre-attached by cold forming.

Doing so would provide a reliable and efficient means of securing the two thermally conductive members.

6. Claims 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Colleran (U.S. 5,098,320) in view of Dozier, II et al. (U.S. 5,820,014) as applied to claims above, and further in view of Kao et al. (U.S. 6,602,777).

Colleran's invention, as modified by Dozier, discloses all of the claimed limitations from above except for the pre-attached solder being applied by solder intermetallic compound (IMC) formations.

7. However, Kao teaches the use of solder being applied by intermetallic compound formation (see abstract)

Given the teachings of Kao, it would have been obvious to one of ordinary skill in the art at the time of the invention to furthermore modify the cooling method of Colleran with the use of solder being applied by intermetallic compound formation.

Doing so would provide an alternate means of applying solder between two thermally conductive members.

Art Unit: 3743

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited for disclosing related limitations of the applicant's claimed and disclosed invention. Deppisch et al, Kim et al, Palmer, Green et al, Ma et al and Novotny et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terrell L Mckinnon whose telephone number is 703-305-0059. The examiner can normally be reached on Monday -Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 308-0101. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
